

# Mainstream media UFO stories intrigues public

The term 'fake news' has been a meme for the last couple of years but the recent coverage of UFOs by the New York Times, CNN and Fox News are indeed the real deal.

Despite secrecy and reluctance to discuss the subject by government officials, there's a lot of good, readily available public information to get any enthusiast educated.

While the definition of UFO is Unidentified Flying Object, it is not necessarily associated with aliens or extra-terrestrial objects.

A documentary called "Out of the Blue" gives a great overview of this pneumonia with government involvement.

A March 19th, 1999 NASA letter in the documentary, it doesn't deny existence of UFOs but explicitly concludes 'no evidence of alien life exists on other planets or that UFOs are related to aliens.'

Well, where are they coming from then?

Recent declassified documents reveal the Canadian government has long been documenting sightings as they skyrocketed between 1966-19667.

The UFO files are the highest classified files in the U.S.A government; even higher than nuclear weapons,

The Sky's the Limit

human cloning, etc.

Believed to be ranked at 'magistrate level', it is at least 21 levels above the president of the U.S.A. standard clearance.

No wonder 50-year FBI director J. Edgar Hoover was denied access in July, 1947!

While the FBI has extensive files on UFOs it pales in comparison to what's really behind the curtain.

Catherine Austin Fitts former assistant secretary at US Department of Housing and Urban Development and owner of the Solari Report has run several articles indicating over \$21 trillion missing from the military budget has been finally pinned down.

This explains president Donald Trump's narrative to disclose decades

old hidden advanced technology which rightfully belongs to the people and is the nutshell of UFOs.

Former Liberal Canadian Defense minister from the '60s Paul Hellyer has been a long-time advocate to make all files public.

At 95 years old, he is busier than he's ever been trying to make this happen.

These are exciting days we live in! Sky watch:

Full Moon with bright Mars- Friday, July 27th look South East after 10 p.m. as they stay up all night.

Venus and Crescent Moon set- Monday, July 16th look West after sunset as they set into the midnight horizon.

Delta Aquarids Meteor Shower Peak- Friday Jul 27th look in the constellation aquarius one to two hours before dawn as an expected debris from comet 96P Machholz will fall at a rate of 15-20 per hour. Unfortunately, the full moon make it hard to enjoy.

Public Events:

Milky Way Weekend, Calgary's Rothney Observatory near Priddis-Thursdays, Aug. 19th to 21st from 10 p.m. - 2 a.m.

There will be an array of scopes operated by University of Calgary astronomers and members of the RASC Calgary.
