

# Massive, unknown object heading to Earth from outer solar system?

By NEIL ROBERTS

Just when you thought things could not get crazier, this maybe the home run of them all.

A recent video from secureteam10 called "Something MASSIVE Just Entered Our Solar System" (starts at 10:55 mark) <https://www.youtube.com/watch?v=RP6QfIWd604> gave an 8-minute presentation on a phenomenon that has been a buzz for about a year in the astronomy circuit. In a nutshell, there have been several observations of a large, unidentified entity has been spotted since at least 2020.

According to the Daily Star <https://www.dailystar.co.uk/news/weird-news/bizarre-huge-opaque-object-hard-24393549>, something huge and opaque dimmed a star 100 times larger than our sun by 97% and while National Geographic <https://www.nationalgeographic.com/science/article/mystery-object-blotted-out-a-giant-star-for-200-days> a distant, giant star pulled a disappearing act for about 200 days. Theories range from The Weather Channel [\[dia/space/news/2021-06-22-celestial-visitor-new-mega-comet-has-flown-into-solar-system\]\(https://www.dailystar.co.uk/news/weird-news/bizarre-huge-opaque-object-hard-24393549\) guessing it could be a new "mega comet" 100-370 kilometers wide just under the size of a dwarf planet. On the other hand, the New York Post <https://nypost.com/2021/06/23/harvard-professor-interstellar-object-was-aliens-spy-ship/> Harvard University astronomer Avi Loeb suggested that intelligence reports of unexplained aerial phenomena \(UAP\) maybe alien ships sent to spy on our home world.](https://weather.com/en-IN/in-</a></p></div><div data-bbox=)

When the fake news and independents agree on anything, you know something is up.

I personally have no way of verifying this information and neither do you, so we must start seeking out trusted sources and not fake news.

With UFO and alien disclosures happening at record pace, people are now wanting answers, so it is time to put on your detective hat and become a researcher. You are now the news and I

guarantee you if you solve this one, your name will be in lights for centuries. One of my favorite John Carpenter movies from 1987 called "The Prince of Darkness" <https://putlockers.fm/watch/wvnRDEvQ-prince-of-darkness.html> is about religious and scientific experts allied to stop an evil force foreseen in the sky. Similar idea in the 1981 movie "The Final Conflict-Omen III" <https://ok.ru/video/522131606256>. I am not prepared to release my theory yet because this is beyond "woo woo", but let me drop you a clue because it is like watching a movie.

The Apostle John wrote this in the last chapter of the New Testament in Revelations Chapter 21:1 "And I saw a new heaven and a new earth: for the first heaven and the first earth were passed away" Crazy? Maybe. Stupid? Me thinks not. "The Best is Yet to Come".

Sky watch for the next month: Download this month's sky free chart at <http://whatsouttonight.com/Resources/2021AugSkyWOT.pdf>

**ROBERTS**  
YOUR UNIVERSE

- 1 Crescent Moon & Venus set after Sun-Tuesday, August 10th after Sunset West and watch this duo set into the night after 22:00.
- 2 Saturn "DAY" Observing- Tuesday, August 31st before sunset in SE if you have a good scope, you can see the rings of Saturn in daylight which is a treat!
- 3 Milky Way Brilliance- This is an excellent month to view our home galaxy without freezing. Best time is after 11:00 pm until dawn.
- 4 Annual Perseids Meteor Shower- Thursday August 12th after dark will be the peak of the summer meteor shower with estimated rate of 60-100 meteors per hour on a moonless night. Best view is starting at 11:00 pm facing the NE in the constellation of Perseids until dawn. Check out this viewing guide for details <https://earthsky.org/astronomy-essentials/everything-you-need-to-know-perseid-meteor-shower/>. Happy meteor shower hunting and keep reaching for the Sky!
